EDUCATION

California State University, Fullerton

May 2024

Bachelor of Science in Computer Science

- GPA: 3.5
- Relevant Coursework: Object-Oriented Programming, Data Structures, File Structure & Database, Algorithm Engineering, Operating System Concepts, Software Engineering, Software Testing, Software Process, Software Design, Artificial Intelligence, Computer Communications, Cybersecurity Fundamentals & Principles

TECHNICAL SKILLS

Programming Languages: Python, C++, SQL, HTML, CSS, Javascript, GDScript

Technologies: Git, GitHub, AWS, React, Django, Tailwind CSS, PyCharm, Selenium, PgAdmin 4, Odoo, Godot, PgAdmin 4, PostgreSQL, MySQL, Visual Studio Code

Certificates: Coursera Agile Project Management

WORK EXPERIENCE

Full Stack Software Engineer

June 2024 - Present

SE Builders, Whittier, CA

- Developed a comprehensive website from scratch using React for frontend and Python for backend development, and hosted PostgreSQL on AWS RDS for database management. Configured Gunicorn as the WSGI server to handle concurrent requests and integrated Nginx as a reverse proxy to manage traffic and serve static files. Designed and developed frontend interfaces and utilized AWS for scalable deployment.
- Architected the website for scalability and efficiency using AWS services, including S3 for storage, RDS for database management, and Route 53 for domain management. Applied best practices such as user-friendly design, secure coding, and robust error handling to ensure high performance and reliability.
- Managed design, development, deployment, and ongoing maintenance using AWS EC2 for computing resources and Cloud for scalable deployment. Demonstrated strong problem solving skills and initiative to achieve high quality results.
- Optimized the company's bidding process, improved CRM tracking, and contributed to acquiring more clients through the website. This resulted in a 25% increase in average project sizes and a significant boost in revenue.

Coding Instructor

June 2024 - October 2024

Coding Mind Academy, Irvine, CA

- Tailored lessons to align with each student's learning pace, using adaptive teaching strategies to deliver personalized learning and effective understanding. These efforts led to a 75% retention rate.
- Utilized interactive teaching methods, including thought provoking questions and coding challenges, to engage students and reinforce concepts. Assigned targeted homework and facilitated project based learning, enabling students to practically apply their skills and achieve tangible results.

K-16 Computer Science Mentor

January 2024 - June 2024

Cal State University Fullerton, Fullerton, CA

- Mentored a group of 16 students, with 62.5% maintaining motivation and engagement in computer science. Guided students on data structures, data science, and Python to enhance their academic journey and technical skills. Facilitated mock interviews and provided personalized support to students, resulting in successful internships and critical milestones.
- Established and managed a Discord server to create an engaging, motivating environment. Promoted peer support and active participation, contributing to a more enriching learning experience and academic success.

PROJECTS

U Pick Me Cherries

June 2025

- Redesigned and rebuilt an outdated cherry farm website using React, crafting a fully responsive, modern UI with improved SEO and accessibility. Personally designed the layout, fixed broken links and visual issues, and implemented organized navigation to enhance user experience and engagement.

MyAlfred

January 2024

- Developed a dynamic chatbot by leveraging YouTube and OpenAI APIs for personalized music discovery and tailored responses. Integrated dynamic playlist features with YouTube's API and employed GitHub for source control and team collaboration, ensuring an efficient development process.
